MOTION AMPLIFICATION® TRAINING

During Motion Amplification® training, you'll have an opportunity to hone your skills using real equipment. After earning a certification, you'll be ready to head back to your organization, ready to go.

Attending Level 1 Motion Amplification® training gives students the skills they need to enter the field with their Iris M™ system, but there are always new skills and features to learn more about. Customers have full access to our remote education materials from webinars to step-by-step feature videos.

What you will see:
Section 1 Introduction to Motion Amplification®
Section 2 Cameras, Lighting, and Lenses
Section 3 Introduction to Motion Explorer
Section 4 RDI Acquisition
Section 5 RDI Motion Amplification®
Section 6 Introduction to Motion Studio
Section 7 Maintaining the Motion Explorer Database

The training is followed by a 50-question exam lasting 1 hour, after which a certificate is issued if the participant gets a mark higher than 70%.
